

Contents of volume 91

Number 1

Regular articles

- KERSTIN ROSANDER and CLAES VON HOFSTEN (*Uppsala University*)
Infants' emerging ability to represent occluded object motion, 1–22

- GRANT GUTHEIL (*Skidmore College*), PAUL BLOOM (*Yale University*), NOHEMY VALDERRAMA, REBECCA FREEDMAN (*Skidmore College*)
The role of historical intuitions in children's and adults' naming of artifacts, 23–42

- CONNIE SUK-HAN HO (*The University of Hong Kong*), DAVID WAI-OCK CHAN (*The Chinese University of Hong Kong*), SUK-HAN LEE, SUK-MAN TSANG (*Hong Kong SAR Government*) and VIVIAN HUI LUAN (*The University of Hong Kong*)
Cognitive profiling and preliminary subtyping in Chinese developmental dyslexia, 43–75

- ANNE CASTLES (*The University of Melbourne*) and MAX COLTHEART (*Macquarie University*)
Is there a causal link from phonological awareness to success in learning to read?, 77–111

Number 2

Regular articles

- BOB REHDER (*New York University*) and REID HASTIE (*University of Chicago*)
Category coherence and category-based property induction, 113–153

- MARK A. WILLIAMS (*University of Melbourne*), SIMON A. MOSS and JOHN L. BRADSHAW (*Monash University*)
A unique look at face processing: the impact of masked faces on the processing of facial features, 155–172

- LISA FEIGENSON and JUSTIN HALBERDA (*Johns Hopkins University*)
Infants chunk object arrays into sets of individuals, 173–190

Brief articles

- YVES-ANDRÉ FÉRY (*Université des Antilles et de la Guyane*), RICHARD MAGNAC (*Université René Descartes*) and ISABELLE ISRAËL (*CNRS et Collège de France*)
Commanding the direction of passive whole-body rotations facilitates egocentric spatial updating, B1–B10

CATHERINE MARTINET (*F.P.S.E. (Unimail)*), SYLVIANE VALDOIS (*L.P.N.C. (CNRS)*) and MICHEL FAYOL (*LAPSCO, CNRS*)

Lexical orthographic knowledge develops from the beginning of literacy acquisition, B11–B22

TESSEI KOBAYASHI (*The University of Tokyo*), KAZUO HIRAKI (*Japan Science & Technology Corporation*), RYOKO MUGITANI and TOSHIKAZU HASEGAWA (*The University of Tokyo*)

Baby arithmetic: one object plus one tone, B23–B34

Number 3

Regular articles

STEFAN FRISCH (*University of Potsdam*), ANJA HAHNE and ANGELA D. FRIEDERICI (*Max-Planck Institute of Cognitive Neuroscience*)

Word category and verb–argument structure information in the dynamics of parsing, 191–219

ISABELLE ECUYER-DAB and MICHÈLE ROBERT (*Université de Montréal*)

Have sex differences in spatial ability evolved from male competition for mating and female concern for survival?, 221–257

MICHAEL BROSCHE, ELENA SELEZNEVA, CORNELIA BUCKS and HENNING SCHEICH (*Leibniz-Institut für Neurobiologie*)

Macaque monkeys discriminate pitch relationships, 259–272

FLORIAN HUTZLER (*Universität Salzburg*), JOHANNES C. ZIEGLER (*CNRS, Université de Provence*), CONRAD PERRY (*The University of Hong Kong, Macquarie University*), HEINZ WIMMER (*Universität Salzburg*) and MARCO ZORZI (*Università di Padova*)

Do current connectionist learning models account for reading development in different languages?, 273–296

Brief article

LIINA PYLKKÄNEN (*New York University*), SOPHIE FEINTUCH, EMILY HOPKINS (*Massachusetts Institute of Technology, Portsmouth High School*) and ALEC MARANTZ (*Massachusetts Institute of Technology*)

Neural correlates of the effects of morphological family frequency and family size: an MEG study, B35–B45

Author index, 297

Contents of volume 91, 299–300
